- SMS / Email on exposure burst
- Real-time portfolios and market information
- Graphs to track and depict favorite stocks
- Streaming News
- Auto Sell on predefined parameters
- Day trade report to track the day's proceedings
- Other additional reports
- Administration Control Panel
- Live Support

Live & Real time web based Market Watch

Market Watch shows the real-time changes in market rates of shares. The company symbols are listed in the first column titled **Scrip**.

The market status of companies might be displayed on more than one page. The right corner under the Market Watch title bar shows the number of page that you are currently viewing and the total number of pages (e.g., Page 1 of 4—signifies that page 1 is currently displayed and there are 4 pages in total).

The titles of all pages are listed on the left corner under the Market Watch title bar. To view a specific page, click its title. During live market, any activity (positive or negative) in a particular scrip is expressed by the highlight of that scrip by changing colors with respect to high or low change.

New Order

To buy or sell shares of a company, you need to place an order. You may place a simple order by specifying the basic buying/selling details. You may also place an advanced order, specifying condition-based transactions.

To place an order quickly, press F8 for Buy and F9 for Sell.

The screenshot shows a 'New Order' dialog box with a blue header and a light blue background. It contains a table with the following columns: Type, Qty, Symbol, Limit, Rate, and a blank column. The 'Type' dropdown is set to 'Buy', and the 'Limit' dropdown is set to 'Limit'. There are input fields for 'Qty' and 'Rate', and a 'Place' button. Below the table is a 'Status' field.

Type	Qty	Symbol	Limit	Rate	
Buy			Limit		Place
Status					

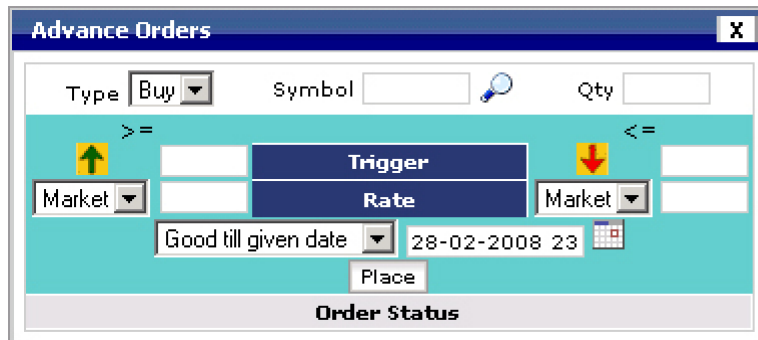

The screenshot shows a 'New Order' dialog box with a blue header and a light pink background. It contains a table with the following columns: Type, Qty, Symbol, Limit, Rate, and a blank column. The 'Type' dropdown is set to 'Sell', and the 'Limit' dropdown is set to 'Limit'. There are input fields for 'Qty' and 'Rate', and a 'Place' button. Below the table is a 'Status' field.

Type	Qty	Symbol	Limit	Rate	
Sell			Limit		Place
Status					

You cannot place a simple order in market off hours i.e., when the stock market is closed.

Advance Order

To place an advanced order, click Advanced on the New Order menu. You can place an advanced order even in off hours i.e., when the stock market is closed.

- Select the type of transaction (i.e., Buy or Sell) from the drop-down list titled **Type**.
- Enter the symbol of the company whose shares you want to buy or sell in the field **Symbol**.
- Specify the number of shares you want to buy/sell in the field **Qty**.
- You can specify conditions to buy/sell shares. Enter the value above/below which the transaction should be carried out in the field **Trigger**.

To set a condition for the market share value exceeding a given figure, use the section marked with the green up arrow .

To set a condition for the market share value below a given figure, use the section marked with the red down arrow .

5. Specify the buying / selling rate in the field **Rate**.

If you choose to buy/sell shares on market rate, select **Market** from the drop-down list. The rate of buying/selling would automatically be adjusted according to the market. To specify the buying/selling rate, select **Limit** from the drop-down list and specify the value in the corresponding field.

6. Specify the order validity period in the following fields.

To set a date until which the order should remain valid, select **Good till given date** from the drop-down list. Enter the desired date in the corresponding date field. To set an indefinite order validity period until you choose to cancel it, select **Good till Cancellation**.

Today's Orders

To view details of all orders placed on the day you log on, click **Today's Orders** on the **Existing Orders** menu. A list of all orders for the day will be displayed.

To cancel an order, click **Cancel** corresponding to the order record.

Pending

Live Support

This is an Online Support for brokerage house clients. Users while browsing the website, if required can ask for assistance or Help. User can chat live with the Customer Support Officer of the brokerage house. User can put forward his questions & queries regarding use of the website or brokerage house services. User can view Customer Support Officers Status but independent of the status user can put forward his questions & queries.

When CSO is online, both can chat live and CSO can assist user to the full. When CSO is offline, user will get an Auto Message warning about the offline status of the Customer Support Officer. On the other hand CSO will get all the messages and questions the next time he logs on & vice versa.

The screenshot shows a web browser window with a chat interface. The title bar of the window reads "Customer Chat Room". The chat history contains the following messages:

- Yasir :** is there any shortcut key for order window ?
- Support Officer :** Yes, press F8 for Buy window and press F9 for sell window.
- Yasir :** is Cash position is updat real time?
- Support Officer :** Yes, it is real time and calculate real time inventory.

Below the chat history is a text input field labeled "Enter the Message" with a cursor. To the right of the input field are two buttons: "Send" and "Close". At the bottom of the browser window, the status bar shows "Done", a "Trusted sites" indicator with a green checkmark, and a zoom level of "100%".

DEVSULTAN eBroker STP

The application facilitates setting up customer accounts with custom rules which includes exposure policies and commissions etc. It also provides interfaces to CDC and KATS. The clearing and settlement functions are also customizable to customer needs and provide features like bill generation, cancellation, and chart of accounts, general ledgers and over 70 reports to look at the data from multiple perspectives.

Features

- Manages customer's personal details.
- Ability to set up customer specific parameters e.g. exposure policies, commissions etc.
- Ability to set up traders, agents and members
- Import interface with CDC
